TALKS ON TEETH

By Dr. Van Vroom

TEETH WITHOUT PLATES.

It seems a wonderful and impossible thing to the average "plate" wearer that we can put teeth in the mouth and make them stay there firmly without the use of a plate.

Almost the first question put to us by a plate victim is "How can you do it? and what holds them in place?"

The Alveolar method of putting in teeth is our secret. The fact that we do the work successfully and that it is both beautiful as well as successful is proof the secret is valuable

Given two or more teeth in either jaw, tight or loose ones (we make the loose ones tight and healthy, we promise to put in a beautiful set of teeth, each tooth set independently of its neighbor the whole forming a piece of work that can not be told from the best that nature can do.

Will they last?

The question usually follows:

We can show hundreds of cases that have been in upwards of four years and are, if anything, more firmly intrenched to-day than when the work was finished.

They will outlast those who are wearing them.

Will you come in and let us look your teeth over? The consultation and examination are free.

No obligation goes with it to have any work done unless you wish to employ our services.

If we can enable you to do away with a wobbly, unclean, unsatisfactory, painful plate, wouldn't it be the greatest service that could be done for you?

CAUTION.—Look out for imitators and imposters. We have NO OFFICES outside of those given below.

1007 MARKET STREET, NEAR SIXTH
1507 FILLMORE STREET, COR. O'FARRELL

We might preach VAN VROOM "Alveolar" dentistry from now until doomsday, but unless we are able to show proofs, in the shape of work done successfully—work which other dentists could not do—then all our preaching would be in vain. We realized at the very beginning of our work with the Alveolar Method that we must make good AND CONTINUE TO DO SO.

We knew that our brethren in the dental profession would not take kindly to any such radical departures as we proposed to make. In short, we knew that we were in for a fight for recognition, not alone from the profession, but from the public, and nothing short of making good IN EVERY INSTANCE would avail, if we were to win.

We had to go ahead slowly and make each case a walking and TALKING advertisement for us.

LOOSE TEETH.

The most dreaded disease of the dental profession is Alveolar Pyorrhea, commonly known as Riggs' Disease.

In such cases the gums become congested, recede from the teeth, causing them to become loose and fall out in time.

Most dentists, in fact, we might say ALL dentists, throw up their hands when such a case comes before them and declare there is no remedy for the "loose tooth" victim.

They can only suggest the "pulling" cure, and as a consesuence many an unfortunate is wearing a whole or partial plate to-day by reason of such ignorant advice.

It seems a pity. Teeth perfectly sound—just LOOSE. We CURE SUCH CASES AND GUARANTEE THE WORK.

When we make this statement we are fully aware that almost every other dentist in town will want to argue the question with us and enter a firm denial that Riggs' Disease cannot be cured.

Why not? Simply because they have tried and failed?

That won't do for an answer.

If YOU have some loose teeth, and want a practical demonstration of our ability to cure the cause and make the gums strong and healthy again, it is only a short trip to our office at Sixth and Market Sts., or O'Farrell and Fillmore.

It will be an easy matter to make us "fish or cut bait." The examination is absolutely free.

A few years ago Marconi came before the world and said he could send messages through the air without the aid of wires.

Every telegraph operator in the land said, "Nonsense, it can't be done." But Marconi did it, and is doing it to-day.

We shall go a step further and make a broader claim for our method of curing loose teeth.

If you have two or more teeth in either jaw, whether tight or loose, we will not only tighten the loose ones, but will build teeth around them and give you a full set that will look, feel and to all intents and for all purposes be the same as those that nature gave you, WITHOUT USING A PLATE.

With these teeth you will be able to chew beefsteak or anything else you care to eat, and get all the enjoyment you used to get when you had all your natural teeth.

Now, if this statement is true, it is remarkable.

Such a thing has never been attempted before we patented the process. It is so remarkable that we are not surprised sometimes at the doubting Thomases who come here and demand proof before they will have the work done. We are glad to give you that PROOF.

Don't, we beg of you, don't allow a single loose tooth to be pulled without first letting us look at it.

Save your teeth.

We will help you.
